TO WHOMSOEVER IT MAY CONCERN

GNRC Ltd., the first super specialty healthcare chain in North East India was established in the year 1987 by renowned neurologist **Dr. Nomal Chandra Borah** (DM - Neurology, AIIMS Delhi).

The first Hospital established under this brand was at **Dispur, Guwahati in 1987** which is a 155 bedded multispecialty Hospital.

In **2008**, Dr. Borah established another facility of **GNRC at Sixmile** which is a 88 bedded multispecialty Hospital in the Heart of Guwahati city.

In **2011**, concerned that most private healthcare facilities, including those set up by him, were unaffordable for the majority of the population, Dr. Borah initiated determined efforts to formulate a model that enabled access to quality and affordable healthcare for majority of the population. This led to the formulation of an operating and service delivery model, which found its expression in **GNRC Institute of Medical Sciences**, which commenced operations in early 2014 at North Guwahati.

GNRC is coming up with a 300 bedded multispecialty Hospital, **GNRC Community Hospital** at Barasat, West Bengal shortly thereby expanding its foot print beyond North East.

This is to certify that **Mr. Zabanur Alom** has successfully completed his Project in the department of **Human Resources** on "**A Study on The Training & Development Programs With Reference To GNRC Hospitals, Sixmile**" from **July 1st, 2018 to September 10th, 2018** at GNRC Hospitals Ltd, Guwahati.

During his association with us, we found him to be a sincere and go getter person.

We wish him success in his future endeavors.

Yours Faithfully,

GNRC LTD.
