My special findings and appreciation towards the " University of Science & Technology Meghalaya " (USTM) :-

I would like to express my appreciation to the University of Science & Technology, Meghalaya for its holistic development involving university community from different socio economic background and social responsibilities in the society. The University not only enhances the growth academically but it instills humanitarian leadership qualities in its students. Their contribution towards Community development is praiseworthy and Commendable. Its takes huge effort to organise educational programmes that also include civil values amidst the many challenges. There is a need to strengthen the University and I would highly recommend an extensive support from the Government and from all concerns to enhance their growth which would enable them to further mold the students of not only the State but the region as a whole and beyond.
