# Annual E-Governance Report

17-18

University of Science & Technology
Meghalaya

E-Governance

The objective of setting up of e-governance at USTM is to help streamline operations and utilise the resources in an optimal way. It is expected that e-governance will make workflow in the university functioning more efficient with computerised operations and make accurate data and information available to users. This will help in reducing paper work, time taken for movement of papers and files in official work and better utilisation of human resources.

We have initiated implementation of E-Governance in the University in the area of Finance and Accounts, Student Management and Support, HR & Administration and Examination Management only in a phase wise manner in the year financial year 2017-18.

Finance and Accounts:

Accounts Management System
University of Science and Technology, Meghalaya

PASSWORD SECURED LOG IN PAGE

The specific benefits which we could derive from the automation process are that we could track our daily and monthly collection of fees from the students for reconciliation and accounting. Fees due report could also be generated for better

monitoring and tracking the receivables. This has helped us in more accurate cash flow management and forecasting mechanism for the financial management of the University.

HR & Administration:
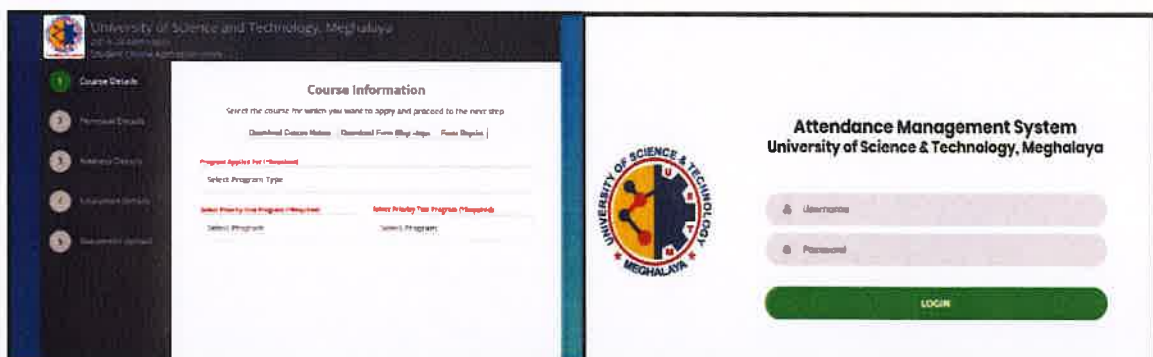

An HRM system allows employers to store and track all human resources documents, training and evaluations.

Student Management and Support:

STUDENT ADMISSION & SUPPORT LOG IN PAGES
