

About the cell:

USTM Intellectual Property Rights Cell (USTM IPR Cell) was created in 2014 with a vision to develop human resource in the management of Intellectual Property Rights as a vital part of the innovation process and the innovation value chain in the university.

The Cell has been involved in several IPR Awareness and implementation programmes within the university and outside.

Several patent and copyright applications would be filed based on the innovations done in the University

Key objective of the IPR cell is:

- to enhance the quality of thinking process, create an environment culture of regard and respect for IPR, ensure speedy and accurate identification and protection of innovations arising out of the research work carried out in the university,
- to facilitate transfer of knowledge and technology from the university to industry and enhance the scope of their commercialization.

The USTMIPR Cell also aims to offer assistance to grassroots innovators in state and covering NE region to realize the commercial benefits of their innovations.

In future, it would also act on policy matters related to IPR in India with special emphasis on issues relevant to the North East Region.

Vision:

To become a world class centre for the creation of human resources in the field of Intellectual Property Rights (IPR) through establishment of systems for integration of IPR in the Knowledge Value Chain in the norms university framework.

Mission:

USTMIPR cell aims to grow into a centre of excellence in the entire North Eastern related to IPR Education, innovation management integrated with IPR within an educational Framework and to protect IPR for socio-economic development, and contributing towards development and implementation of IPR Policy in the regional and nation at large.

Programme output:

1. Sensitizing and mobilizing students of PG and UG, issues of intellectual property rights in an academic system so that they imbibe ethical practices at an early phase of their lives, as they step into their professional trajectories.
2. Researchers with enhanced skills in technology based literature searches that include accessing and analyzing patent literature and to utilize the same for focused research work.
3. Researchers with solutions to their research problems thereby enhancing the quality of research output and targeting them for possible commercialization
