## About the webinar

Medicinal and aromatic plants occupy an important position in the socio-cultural, health care and spiritual arena of the people of India. Medicinal plants contributed significantly to the rural livelihoods. Globally, medicinal and aromatic plants (MAPs) constitute one of the integral parts of the biodiversity, ecosystem and biological heritage. So, the main objective of the webinar is to discuss on utilization of various recent agricultural technologies for the production of quality herbal medicinal plants.

**Eligibility:** Open for all.

# Exploring virtual society through Digital Ethnography: A Qualitative Approach

Date: 8<sup>th</sup>-10<sup>th</sup> June, 2022

Organized by

**Department of Sociology**

**UNIVERSITY OF SCIENCE & TECHNOLOGY MEGHALAYA**

Accredited 'A' Grade by NAAC

Venue : Block - G, USTM

## Concept Note

With the advancement of industrialization and technology, digital society emerged and reshaped the societal structure and systems. Today, individuals are not just members of a society or community, but simultaneously an inevitable part of the digital society. Digital space is no more an exclusive platform for scientists and business experts but an integral service to the people. Pattern of human relations changed in the digital society. In the physical society, every act may not be recorded or traced, but human behaviour or activities in the digital society is systematically recorded and traced as information. This information as big data is an object of business and industrial investment in the digital society. Therefore, the new role of sociology is to understand the digital society in the diverse contexts of advanced industrialism, late capitalism, and informationalism. Digital Sociology, a new sub-discipline, aims to understand and explore the structure, systems and issues of digital society. A new version of ethnography, called digital ethnography, has been used in digital sociology as a leading method of research.

The workshop intends to provide necessary insights of 'Digital Sociology' and 'Digital Ethnography' to young researchers and post-graduate students. It will help them develop skills in research and writing.

**Following are the broad themes but not limited to these.**

- ❖ Importance of Digital Sociology
- ❖ Methodology in Digital Sociology
- ❖ Globalization of Digital space
- ❖ Digitalized social relation
- ❖ Information in the digital society
- ❖ Dimension of digital ethnography
- ❖ Digital participation as a method

Dear Adam,

A quick one as I'm traveling right now. As i mentioned I'll be happy to deliver a talk, but I'm not an expert on digital ethnography. I guess we agreed to have a talk on Digital Capital, from theory to empirical research. It's not a qualitative research, but rather a quantitative one.

Please let me know if this works for you.

Best regards

Massimo

As per our conversation on the workshop, I would like to inform you that it is scheduled on 8th to 10th June. I have kept your session on 8th June.

I will send you Official invitation letter and Zoom/Google meet id shortly.

Please acknowledge the receipt of this email.

Looking forward to seeing you in the workshop.

Best regards,  
M Hasan Laskar

**Dear Hasan,**

many thanks for your letter, information and your assistance. I've got your letter also at my other address (boddhi@yandex.ru). I check both addresses every day, so you can write to any of them, as it's more convenient for you.

How much time will I have for my presentation? Do you have any suggestions for its topic?

With the best wishes,  
Yulia Epikhina
